

Fast access to commands

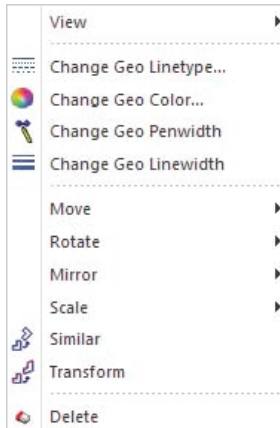

Command mini toolbar (CMT)

The CMT opens when an element is pre-selected. It shows the most-likely commands for this element.

Context menu

Shows an extended list of commands when you right-click a pre-selected element.

- Ctrl O** Open
- Ctrl S** Save
- Ctrl P** Print

User interaction

Important user interaction concepts:

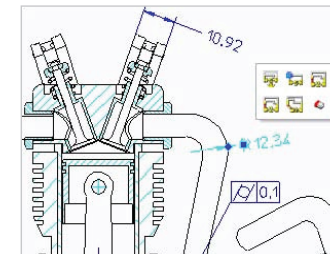

- **Flyby**

When you point to an element (for example, a line) the element is highlighted.

- **Pre-selection**

When you select an element, a Mini Toolbar opens, which shows the most-likely commands for this element. Where applicable, a drag handle for the first command in the Mini Toolbar also appears.

- **Action**

When you click either a button on the Mini Toolbar or the drag handle, the element is selected and the related command starts.

For more shortcuts, see the Creo Elements/Direct Drafting help.
